

Falcon 9 Launch Data Analysis

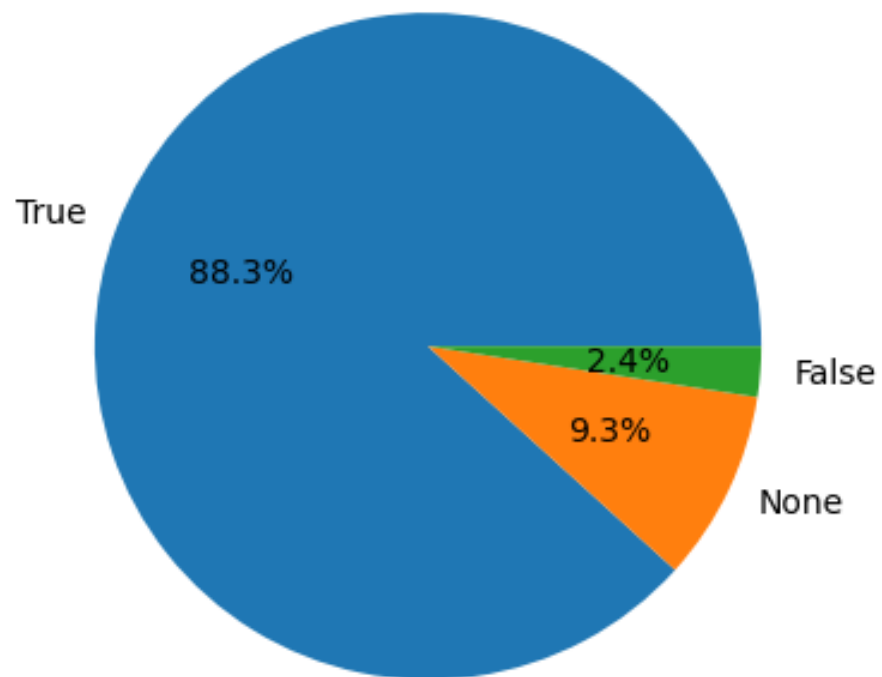

By: Tasnim Jeba Ashfi (Class 11, Bangladesh)

This short report summarizes key findings from SpaceX Falcon 9 launch data using public SpaceX API. The project focuses on launch frequency, success rate, and booster reusability trends.

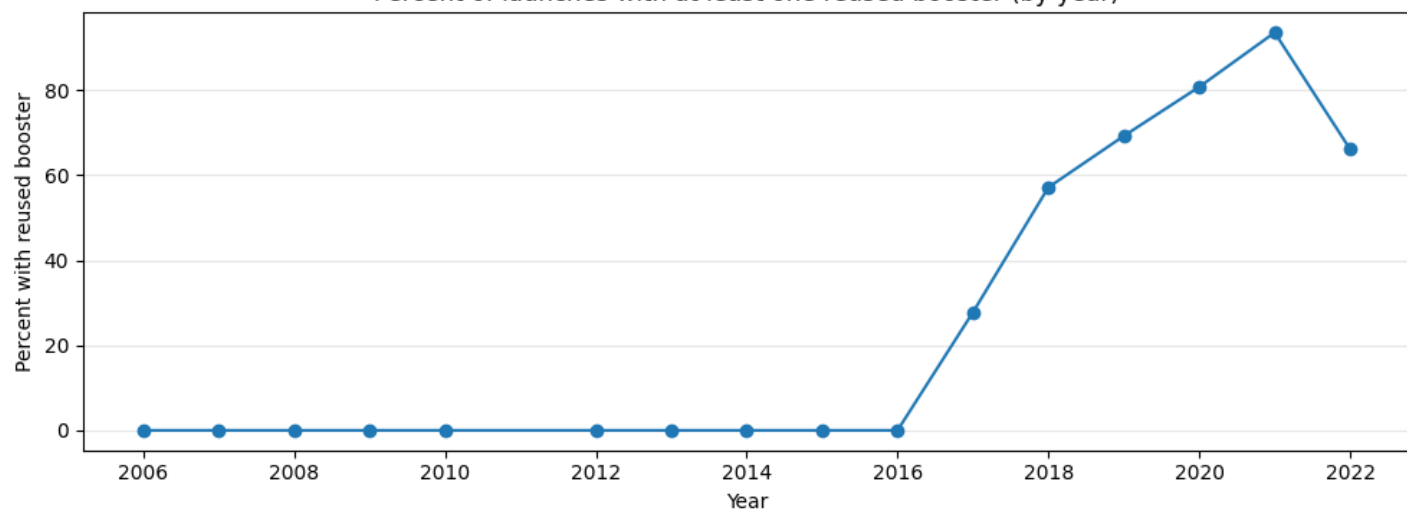

SpaceX launches per year

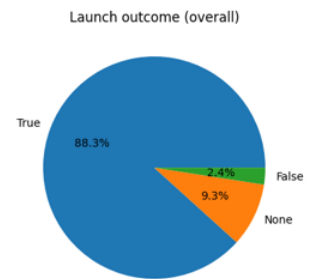

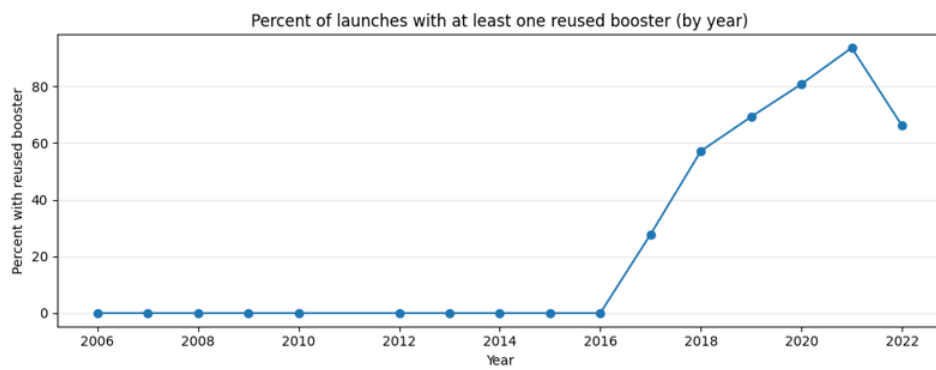

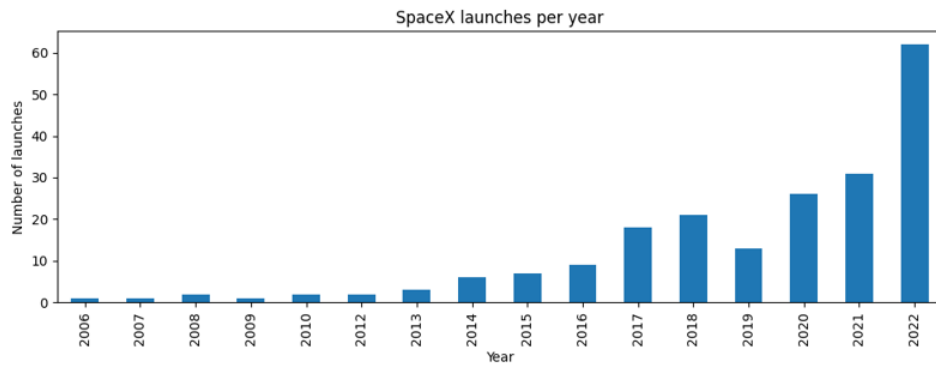

Launch outcome (overall)

Percent of launches with at least one reused booster (by year)

Key findings:

- Falcon 9 success rate ~97% (overall).
- Booster reusability increased significantly after 2017.
- Starlink deployments are a large share of recent launches.
- Failures led to improvements and higher reliability.
